

ABEER SAJID

abrsjd5@gmail.com | Charlotte, NC, USA | Open to Relocate | Visa Status: H1B | github.com/abeer-sajid | abeer-sajid.github.io

PROFESSIONAL SUMMARY

Production Support Engineer delivering incident management, incident response, root cause analysis (RCA), and system monitoring for high-availability, regulated healthcare payment platforms. Skilled in observability and monitoring tools (New Relic, Splunk, Dynatrace, AWS CloudWatch, Catchpoint), ITSM incident workflows (BMC Remedy), on-call support, SLA compliance, process improvement, and cross-functional stakeholder communication. Builds AI/ML solutions using Python, LangChain, OpenAI API, and RAG (Retrieval-Augmented Generation) pipelines, including LLM agents for automated incident triage.

EXPERIENCE

Production Technical Support V — L2/L3 Support

Jul 2024 – Jul 2026

Bank of America · Charlotte, NC · On-site · Contractor

- Formally aligned under L2 production support scope but regularly extended into L3-level work, performing deeper root-cause diagnostics, querying production databases directly on AWS (RDS/Aurora) to get the data.
- Served as triage manager for production support on the AxiMed healthcare payment platform, leading high-profile bridge calls for major merchant-impacting incidents with composure under pressure, resolving critical issues within SLA compliance targets to protect payment reliability.
- Acted as the team's go-to expert for Splunk log analysis and New Relic monitoring, also leveraging AWS CloudWatch, Dynatrace, and Catchpoint to proactively identify and remediate issues across APIs, databases, and third-party integrations before end-user impact.
- Built and maintained AWS CloudWatch playbooks, and authored supporting documentation mapping alarm thresholds to remediation steps, and giving L2 responders a clear escalation path for complex incidents.
- Managed end-to-end incident lifecycle using BMC Remedy, performing root cause analysis (RCA) and driving process improvements to prevent recurring issues, while maintaining stakeholder communication and cross-functional collaboration with engineering teams.
- Trained and mentored new hires on incident response processes, monitoring tools, and troubleshooting procedures, operating beyond scope of role to strengthen team readiness and reduce onboarding ramp-up time.
- Authored knowledge base documentation, runbooks, and troubleshooting guides, including AWS CloudWatch monitoring guides and SQL query references for production database investigations, that accelerated team resolution times; recognized by senior leadership for technical depth, ownership, and performance under pressure.

Software Engineer Trainee

Feb 2024 – Jul 2024

Innovative Consulting Solutions, LLC · Chicago, IL · Remote

- Assisted senior engineers in developing, testing, and debugging software features for client applications using Python, Pytest, and Git, participating in Agile sprint ceremonies and peer code reviews to support on-time delivery.
- Identified, documented, and resolved software defects across client-facing applications, improving code quality and reducing recurring issues through systematic testing and root cause documentation.
- Collaborated with cross-functional teams of developers, QA, and project managers to gather requirements and support client deliverables, gaining hands-on exposure to the full software development lifecycle (SDLC).

Graduate Assistant — Instruction, Computer Security

Aug 2023 – Dec 2023

University of Alabama at Birmingham · Part-time, On-site

- Supported instruction for an undergraduate and graduate-level Computer Security course, assisting with lecture preparation, lab sessions, and grading to reinforce student understanding of core security concepts.
- Held office hours and one-on-one sessions to help students troubleshoot coursework and lab exercises, strengthening technical mentoring and communication skills.

Web Developer

Oct 2019 – Sep 2021

Netrex Inc. · Remote

- Designed, coded, and modified responsive websites from layout to full functionality using HTML, CSS, JavaScript, WordPress, and Wix, translating client specifications into user-friendly, production-ready web solutions.
- Collaborated with cross-functional teams of designers, content creators, and project managers to deliver high-quality web solutions on schedule, strengthening stakeholder communication and requirements-gathering skills.
- Conducted cross-browser and cross-device testing and debugging to ensure consistent functionality and performance, while staying current with emerging web development trends to continuously improve technical delivery.

AI RELATED PROJECTS

AI Incident Triage Agent — Built an AI agent using Python, LangChain, and LLMs to automatically classify, triage, and route production alerts to the correct team and generate suggested remediation steps, reducing manual incident classification effort.

RAG Knowledge Chatbot — Developed a Retrieval-Augmented Generation (RAG) chatbot using LangChain, OpenAI API, and vector database/embeddings-based semantic search over internal documentation and runbooks, eliminating manual lookups for support teams.

Maze Game Bot — I developed a Maze Game Bot that uses the A* Algorithm for intelligent pathfinding. The bot can find the shortest path through the maze quickly and accurately.

TECHNICAL SKILLS

AI / ML Engineering — Python · LangChain · OpenAI API · FAISS · RAG Pipelines · LLM Agents · FastAPI · Prompt Engineering · Vector Databases · Embeddings · Generative AI
Monitoring & Observability — New Relic · Splunk · AWS CloudWatch · Dynatrace · Catchpoint · APM · Log Analysis · Synthetic Monitoring

Cloud & Infrastructure — AWS (EC2, S3, Lambda, RDS)

ITSM & Incident Mgmt. — BMC Remedy · JIRA · SLA Management · Incident Management · Incident Response · On-Call Support · Problem Management · Change Management · Root Cause Analysis (RCA) · ITIL · Agile/Scrum · Escalation Management · Ticketing Systems

Web Development — HTML · CSS · JavaScript · WordPress · Wix · Responsive Design

Databases — MySQL · SQL Alchemy · Relational Databases · ORM

Tools & Frameworks — Git · GitHub · Anaconda · Jupyter Notebook · Visual Studio · PyCharm

EDUCATION

Master's in Computer Science — GPA 3.66

University of Alabama at Birmingham, USA

Bachelor's in Software Engineering — GPA 3.09

University of South Asia, Pakistan

CERTIFICATIONS & ACTIVITIES

DataCamp: Working with the OpenAI API; Prompt Engineering with the OpenAI API; Introduction to FastAPI; LLM Ops Concepts; Introduction to LLMs in Python; Developing LLM Applications with LangChain; Retrieval Augmented Generation (RAG) with LangChain; Designing Agentic Systems with LangChain; Vector Databases for Embeddings with Pinecone; Working with Hugging Face.

Udemy: The Complete Splunk Beginner Course; JIRA Fundamentals: Effective Scrum Project Management.

UAB: Cyber Security Completion (Dec 2023).

Research & Social Media Intern — TechHub Connect (Punjab IT Board), Summer 2017.

Freelancing Workshop Certificate of Appreciation — TechHub Connect.

1st National Conference in Emerging Technologies — University of South Asia.
